

Please do not expand the new broadcast service known as Low Power FM (LPFM). From my understanding this would interfere with the KLOVE station in my local area (106.7 FM). This is the only station me, family, and friends listen to. It provides us with positive and encouraging music and messages that is "SAFE" for our small children to listen to. This station also provides our local community with updates such as upcoming events in our local area from concerts and conferences which can only be obtained by this particular station. This station is supported by listeners and not advertisements. The people who listen to this station by FM radio pay KLOVE (106.7FM) to pay for their services so that we can listen to them, now that should update you on how important it is to keep this station available to everyone. Thank you.....Wendy Gentry, Timberlake, NC
